4 First aid measures

4.1 Description of first aid measures · General information: Immediately remove any clothing soiled by the product. Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident. Take affected persons out into the fresh air. After inhalation: Supply fresh air: consult doctor in case of complaints. Provide oxygen treatment if affected person has difficulty breathing. In case of irregular breathing or respiratory arrest provide artificial respiration. In case of unconsciousness place patient stably in side position for transportation. • After skin contact: Immediately wash with water and soap and rinse thoroughly. If skin irritation is experienced, consult a doctor. · After eve contact: Remove contact lenses if worn. Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor. · After swallowing: Rinse out mouth and then drink plenty of water. Do not induce vomiting: call for medical help immediately. A person vomiting while laying on their back should be turned onto their side. · 4.2 Most important symptoms and effects, both acute and delayed Headache Dizziness Coughing Cramp Nausea Allergic reactions Gastric or intestinal disorders when ingested. Disorientation Hazards Danger of convulsion. Danger of impaired breathing. Danger of disturbed cardiac rhythm. Condition may deteriorate with alcohol consumption. May be harmful in contact with skin. May be harmful if inhaled. Repeated exposure may cause skin dryness or cracking. 4.3 Indication of any immediate medical attention and special treatment needed If swallowed, gastric irrigation with added, activated carbon. If necessary oxygen respiration treatment.

5 Firefighting measures

5.1 Extinguishing media · Suitable extinguishing agents: Foam Alcohol resistant foam Fire-extinguishing powder Carbon dioxide Gaseous extinguishing agents Water haze or fog CO2, sand, extinguishing powder. Do not use water. · For safety reasons unsuitable extinguishing agents: Water · 5.2 Special hazards arising from the substance or mixture Formation of toxic gases is possible during heating or in case of fire. 5.3 Advice for firefighters · Protective equipment: Wear self-contained respiratory protective device. Wear fully protective suit. · Additional information Eliminate all ignition sources if safe to do so.

6 Accidental release measures

· 6.1 Personal precautions, protective equipment and emergency procedures Use respiratory protective device against the effects of fumes/dust/aerosol. Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation Keep away from ignition sources. Protect from heat. · 6.2 Environmental precautions: Do not allow to enter sewers/ surface or ground water. Inform respective authorities in case of seepage into water course or sewage system. · 6.3 Methods and material for containment and cleaning up: Allow to solidify. Pick up mechanically. Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Pick up mechanically. Send for recovery or disposal in suitable receptacles. Do not flush with water or aqueous cleansing agents 6.4 Reference to other sections See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

7 Handling and storage

· 7.1 Precautions for safe handling Use only in well ventilated areas.

Revision: 26.06.2014

Trade name: Bead Sealer

(Contd. of page 8) · Protection of hands: Protective gloves The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation. Material of gloves The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. Penetration time of glove material The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. • Eye protection: Safety glasses · Body protection: Protective work clothing · Limitation and supervision of exposure into the environment No further relevant information available. **Risk management measures** See Section 7 for additional information. No further relevant information available. 9 Physical and chemical properties • 9.1 Information on basic physical and chemical properties · General Information

General information	
· Appearance:	
Form:	Liquid
Colour:	Black
· Odour:	Solvent-like
· Odour threshold:	Not determined.
· pH-value:	Not determined.
 Change in condition Melting point/Melting range: Boiling point/Boiling range: 	Not Determined. 210 ° F / 99 °C
· Flash point:	16 °F / -9 °C (TCC D56)
· Flammability (solid, gaseous):	Not applicable.

(Contd. on page 10)

Printing date 26.06.2014

Revision: 26.06.2014

Trade name: Bead Sealer	
	(Contd. of page 9)
 Auto/Self-ignition temperature: 	419 ° F/215 °C
 Decomposition temperature: 	Not determined.
· Self-igniting:	Product is not self-igniting.
· Danger of explosion:	Product is not explosive. However, formation of explosive air/ vapour mixtures are possible.
 Explosion limits: Lower: Upper: 	1,1 Vol % 7,0 Vol %
· Vapour pressure at 20 °C:	48 hPa
 Density at 20 °C: Relative density Vapour density Evaporation rate 	0,87 g/cm ³ Not determined. Not determined. Not determined.
 Solubility in / Miscibility with water: 	Not miscible or difficult to mix.
· Partition coefficient (n-octanol/water)	: Not determined.
 Viscosity: Dynamic: Kinematic at 20 °C: 	Not determined. 721 mm²/s (Converted from <u>5 Zahn)</u>
 Solvent content: VOC (California) 9.2 Other information 	75-90 % Wt No further relevant information available.

10 Stability and reactivity

· 10.1 Reactivity
· 10.2 Chemical stability
 Thermal decomposition / conditions to be avoided:
No decomposition if used and stored according to specifications.
10.3 Possibility of hazardous reactions
Used empty containers may contain product gases which form explosive mixtures with air. Flammable.
Reacts violently with oxidizing agents.
Can form explosive mixtures in air if heated above flash point and/or when sprayed or atomised. Toxic fumes may be released if heated above the decomposition point.
10.4 Conditions to avoid
Keep ignition sources away - Do not smoke.
Store away from oxidizing agents.
 10.5 Incompatible materials: No further relevant information available.
10.6 Hazardous decomposition products:
Carbon dioxide

GHS

Printing date 26.06.2014

Trade name: Bead Sealer

· Additional ecological information:

· General notes:

Avoid transfer into the environment.

Due to available data on eliminability/decomposition and bioaccumulation potential prolonged term damage of the environment can not be excluded.

Water hazard class 2 (German Regulation) (Self-assessment): hazardous for water

Do not allow product to reach ground water, water course or sewage system.

Danger to drinking water if even small quantities leak into the ground.

Very toxic for aquatic organisms

12.5 Results of PBT and vPvB assessment

· PBT: Not applicable.

vPvB: Not applicable.

• **12.6 Other adverse effects** No further relevant information available.

13 Disposal considerations

· 13.1 Waste treatment methods

· Recommendation

Contact waste processors for recycling information.

Must not be disposed together with household garbage. Do not allow product to reach sewage system. Can be burned with household garbage after consulting with the waste disposal facility operator and the pertinent authorities and adhering to the necessary technical regulations.

The user of this material has the responsibility to dispose of unused material, residues and containers in compliance with all relevant local, state and federal laws and regulations regarding treatment, storage and disposal for hazardous and nonhazardous wastes. Residual materials should be treated as hazardous.

· Uncleaned packaging:

· Recommendation: Disposal must be made according to official regulations.

142-82-5 heptane

· Other regulations, limitations and prohibitive regulations

• Substances of very high concern (SVHC) according to REACH, Article 57

None of the ingredients is listed.

· 15.2 Chemical safety assessment: A Chemical Safety Assessment has not been carried out.

16 Other information

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

· Relevant phrases

- H225 Highly flammable liquid and vapour.
- H304 May be fatal if swallowed and enters airways.
- H315 Causes skin irritation.
- H317 May cause an allergic skin reaction.
- H336 May cause drowsiness or dizziness.
- H361d Suspected of damaging the unborn child.
- H373 May cause damage to the central nervous system through prolonged or repeated exposure. Route of exposure: Inhalative.
- H400 Very toxic to aquatic life.
- H410 Very toxic to aquatic life with long lasting effects.
- R11 Highly flammable.
- R38 Irritating to skin.
- R43 May cause sensitisation by skin contact.
- R48/20 Harmful: danger of serious damage to health by prolonged exposure through inhalation.

R50/53 Very toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

- R63 Possible risk of harm to the unborn child.
- R65 Harmful: may cause lung damage if swallowed.
- R67 Vapours may cause drowsiness and dizziness.
